

Sunrise Quarterly Report

Greetings from Kampong Cham, Cambodia!

Dear all, our family in the Lord,

We are so grateful to write this report again to all of you for another quarter in which we have always been very busy with the work. But hard work can not take away our joy and hope as we encounter many situations, good and bad.

Sitting in front of my computer typing, I'm looking back on the 3 months just passed and thinking of what the Lord has been showing through each story in our daily activities.

I'm reflecting to what our InnerCHANGE leader Mr. Mark Smith said: We are all God's agents to bring hope and blessing to the poor of all our target groups, no matter what job we are doing here in Sunrise—finance, guarding, teaching... we are called to be His body. We are sitting with the poor under the heat of the sun while the others are sitting in comfortable places to refresh themselves. It's not by accident but God's will.

Yes, we are all a bit disappointed when we heard that one of our donors will quit supporting Sunrise by the end of this year 2016 (they changed their focus). But thinking of the sentence "We are God's agents to bring hope and blessings to the poor" how could we stay disappointed like that? God gives us hope as he uses us to bring hope to others.

So we have to see the blessings more than sadness!

All of the stories below are not authored to make a pretty report, but they are just coming out from the heart and pure feeling of the clients. Even if they have a hard time expressing everything, getting their feelings flowing out, we can see with spiritual eyes all they want to say in their eyes and faces.

Even my feelings are veiled over by my need to write on paper and in a language that is not my own. I wish many people can hear what we are doing and what's happening but it's so difficult to unfold it with deep meaning the same as the way our clients told us. I hope all of you will hear me well!

Please enjoy the stories with us!

Darany Hang, Sunrise program director

Susan Smith, InnerChange

Education children:

From a little shelter nearby a small curved path comes the sounds of someone hand-making cigarettes. This is how one of our home based care client's children makes a profit and earns her living by working after school. With a shining smile, she bravely speaks:

Hello! My name is Kong Srey Nith. I'm 13 years old, living in Tonle Bet village, Tonle Bet commune with my family. I have a brother and a sister. I'm studying in grade 4th of Tonle Bet primary school this year. My grandmother and my father are both Sunrise's home based care clients.

In the past, I had no good will towards my education because I didn't understand well in all my studies. I was also hopeless because of my family's poverty.

Before Mr. Chhun visited me and taught me, I had a very difficult time with my lessons and homework. I could not read or write well and had bad calculation too. My parents could not help me, even though they don't want me to be like them, as they are illiterate persons and migrants.

Now, I'm happy and enjoy my study. I can read, write, and do arithmetic better after Mr. Chhun taught me in the home visit service. He also met with my school teacher to discuss my weaknesses in my study to give me help.

I would like to give thanks to the donors of Sunrise for providing us this service and for helping the children like me and others in the service.

A Home Based Care client:

Here is Ngoun Sothea a 62 year old woman, one of our home based care clients.

She's living in Au Sandann village, Beung Kok commune, Kampong Cham district.

In the last 10 years, her husband was frequently sick and had serious diarrhoea that did not get well through any treatment. Then after some years he died.

Four or five years after his death, Mrs. Sothea started getting sick. Her body became worse day by day. She got many medicines and injections but still no use. So one of her neighbours got her to take a blood test and found out she was HIV positive. Mrs. Sothea was in a very hard situation those years, because of her own health and living conditions. As a widow, she had no one else to help. Even all of her children had no abilities to help her. In addition, she had 2 grandchildren who are living with her because she wanted them to get education so as not to be like her. She was so worried about them that if she died, her 2 grand kids will be sent by their father (who had a new wife) to find jobs as labourers working to help their family—they would have to leave school. Therefore, she has been trying hard to make a living to take care of them. She made her living by searching out some wild vegetables by the paths and in the village, picking them to sell at the market.

This year, her granddaughter is studying in grade 9th and her grandson is in grade 4th.

Some of the walls of their house were broken. When the rain is falling, it's blown in by the wind, wetting their clothes and other possessions.

Because of her hard situation, Sunrise has supported Mrs. Sothea's needs such as: repairing the house, food supplements, and a small business loan. Mrs. Sothea has a better living now. She can sell about 30000 riels to 35000 riels selling small goods in front of her house (\$8-9) for a profit of about \$2.50, in addition to her vegetable selling.

Deep from her grateful heart, Mrs. Sothea would like to thanks so much for Sunrise and its donors who caring the poor such her. She couldn't use words to describe her feelings, but just gave a blessing with both hands, putting them above her head in the Khmer traditional way!!

Prison Feeding Program story

Hello! My name is Ley Mousa. I'm 23 years old, and a male prisoner. I live in Trea commune, Kroch Chmar district.

I was a student before my arrest and I was sent to this prison on 26-Sep-2015 for a case of drug abuse. When I had been here about one month, my health became very bad. I had a headache daily, pain in my chest sometimes, and it was hard to breathe. All of these problems were getting worse day by day because of lacking nutritious food to eat and not having enough time out of the cell for exercises and sun.

My legs became numb, which made it difficult to get up and walk. I needed to hang onto the window slats if I wanted to stand.

With a sadness and fear, I really, really needed help! I am grateful and thankful for Sunrise that allowed me to join its medical clinic and feeding service for three or four months. Feeding us is a respectable deed that shows that you value me as a person—you gave me dignity. Now I'm getting well and the numbness stopped.

I don't know much about Jesus because I'm an Islam, but through hearing about Him from Sunrise I decided to participate in *God's Message* class with Heart Land's team right now. (Heart Land is a nearby church that is running classes explaining the Bible at the prison.)

Infant formula program:

Testimonies from Teang Saly's mother and grandmother

Teang Saly is a 4-month old baby girl and she is in our Infant Formula Distribution Service. Her mother, 24-year-old Vin Sanin, is living with her own mother, who is 64 years old (she is grandmother to Saly). That means there are 3 of them in their family, living together in their home in Treung Village, Prey Chhor district, Kampong Cham province. Here are their stories below:

I remember my past life....the time I was unhappily facing my poor situation. I left my home at the end of year 2014 to find a job in a factory at PP. Then, 4-5 months after, I was persuaded and cheated by a guy there. He said he loved me, but he already has his wife. After he knew that I was pregnant, he completely abandoned me.

At last, I decided to come back home to give birth to my baby. Unfortunately, when I met the Health Center's staff and had a blood test, I got a shock and was very disappointed because I realized that I'd become HIV positive. I got ARV drugs to prevent it spreading from me to my child. After I delivered my baby, I was guided to receive a service for getting formula for my baby from Sunrise which is very helpful to me. My family's situation is not well enough for me to go on as a widow, remaining enemployed & staying home to take care of my little baby.

So I tried to find a job in a factory again in Kampong Cham where I have been working to this present. I have no time to take care of my own child because of my job, so I left her with my mother at home where she is now doing well—more than me. I could only solve my problem by depending on Sunrise supporting me with my baby's formula milk. Without Sunrise, I couldn't.

In another voice from Teang Saly's grandmother:

"From my grateful heart, I would like to thank you, both Sunrise's staff and all of its donors, for providing this service for the poor. It's very helpful, as my daughter has already described. But a more important thing than this is I have heard more about Jesus through Mr. Heng Ban (the infant formula distributor) during meetings with him. He introduced me to Sunrise's identity and told about God. I used to hear about Jesus, because in my village there is a church there, but I can't read the church's name because I'm an illiterate person, so I don't know much about Him. Now, after Mr. Heng Ban has been sharing Jesus to me, I have known Him more clearly and have faith in Him now.

One day, my other grandson, who is living nearby my house, played by the road, then suddenly ran, crossing the road in front of a big truck which was driving by. I was shouting with a fearful voice, but my grandson didn't get hurt much. He just peeled some skin a little bit while he fell down in the space between the truck's wheels. This was so amazing to me and my family. It caused us to have more faith in God.

In another story, one of my grand little kids had gotten lost one day and no one knew where he was. We were afraid that he might have met an accident or something bad happened to him. My family and my neighbors were sharing ways to find him for the whole day. Some villagers guided us to meet with a fortune-teller to make predictions and some told us we needed to offer food to the spirits or do something related to Cambodian's traditional faith, but we didn't do anything at all except trusting and praying to God.

Finally, we had found my little grand kid sleeping, hidden by some old clothes in a carriage under the house. We believed that there is God, truly with us!

I have six children, and my relatives all believe in God except some of my children who are working far away from home.

Please keep us in your prayers! Thank you!

Orphanage Center Children: (This activity is supported by the Rustic team)

Hello! This is one of the orphanage's children's stories. Rustic has been supporting orphan tutoring fees this year through Sunrise.

With a tender voice and a bit shy, Miss Eang Him, a 19 year old girl and an 11th grade student of Sihanouk high school, slowly spoke:

I have been living in the Orphanage Center with my younger sister since we were so little, after our parents died. Sadly, we transferred from PP Orphanage Center to Kampong Cham Orphanage Center around 2004 and we lost all the background of our family's history. We had not been told about it.

My sister is 18 years old, but she is just studying in grade 5th. because she has problems with her thinking. She does not remember very well, and she has difficulty in her speech (her sound is not so clear) so she doesn't like talking much. She also easily bursts into anger with others. She does not have many friends in her daily life.

I used to have no hope for my education because I have no relatives to support me. I used to ask the professor to let me participate in his tutoring class, and he said ok—if the class has any vacant place, but it never does.

I would love to be a lawyer in my future's dream because I heard so many injustices in our social lives. I plan to finish my study by grade 12. If I fail my exam and could not get diploma II, then I will find vocational training through an NGOs to get food making skill because I will make my own business by selling food with my sister.

Now, after Sunrise has supported my tutoring fees, I have considered again and believe that I have a good chance. I will keep continuing my study until I have the ability to find a job as the others or to fulfill my dream one day.

Prayer Requests

Please pray for:

- *Staff and clients' health & safety during hard periods of weather with rain. Half the time we are sweaty & miserable. The other half we are wet, maybe cold, and the roads are not safe.*
- *Ask God to bless us with more power, love, joy, peace, patience and wisdom in working together.*
- *Continue to pray for all of our staff to understand the new reporting format and how to measure outcomes properly.*
- *Pray for our staff. They are discouraged to hear Ratanak will stop funding its projects by the end of this year. We have applied to some new donors, but we still need to find more.*
- *Continue to pray for God to show us for the real needs in our society for next year's project (2017).*
- *Continue to pray for more opportunities to share about God. Pray also about cults who have stolen the sheep in many areas where we work.*
- *Pray for our leaders Susan, Mark and Sue for wisdom and good health to help Sunrise more.*
- *Pray for finding someone who will help Darany on grammar for English writing to leave Susan more time for finding new donors for Sunrise and to get the staff some training below.*
- *Continue to pray for finding new donors for mid-2016 onwards. One of our donors is sun setting because they have given away all their funds. This needs to be replaced by summer 2016. The other is changing its focus and will need replacing by January 2017.*
- *Mr. Youn Pov, the prison director, died in early July. Please pray for God's hand to provide a new director who is a good person for this role to be in charge of the prison.*
- *Pray for training opportunities for our staff. We would like to do the following trainings this coming year:*
 - *Vision & Mission of Sunrise going forward*
 - *Helping those who have experienced grief and trauma*
 - *Further training on M&E methodology*
 - *Planning Cycle...*

Learning, Improvement & Holistic Impact

Strengths	Weaknesses	Recommendations
<p>Prison clinic:</p> <ul style="list-style-type: none"> -We have been following our plan of signing for attendances each clinic time before starting work. -ICRC staffs have completed their operation of boiling the prisoners' clothes and materials in each cell for solving itch spreading. -We have given 2 sick-beds for prison clinic which are very helpful for the prison health staff on checking and treating the sick prisoners. Also 2 desk-glasses which were broken for few years to prevent any accidental cut. -Our medical staff have contacted to ICRC staff to know when they plan to use the prison clinic next time, so we could change our activity to visit Home Based Care or doing other works in replace. 		
<p>Prison feeding program:</p> <ul style="list-style-type: none"> -We have solved some problems from Q1 such as: *Buying a new scale to weigh the participants monthly. *We have designed a new form to make food and weight recording easier. *We have found out the BMI (Body mass index) as a measure for indicating nutritional status of the participants. -Holistic staff has taught some more lessons (Power of God's love, Past life vs. new life in God) through the feeding time. We realized that our teaching before their eating was not comfortable for them to wait for their meals, so we have changed it to teach after their eating for a longer time 	<ul style="list-style-type: none"> - We have been being late of finding it. -The atmosphere of the room is not fit with teaching (Situation of the prisoners' sitting as a line). The staff need to spoke loudly and stand in the half of the line of the prisoners while teaching, and the voice's not well enough to hear for the top sitting of the line. 	<ul style="list-style-type: none"> - We will have discussion on making criteria for selecting a very specific sort of person to this service next quarter. -We will be careful next quarter. -We will discuss about this to find how we could getting them more comfortable listening to the lessons.
<p>Home-based care program:</p> <ul style="list-style-type: none"> -We have repaired the clients' shelters for their needs most because it's a rainy season now. -We have taught AIDS pictorial 	<p>We still be late to get feedback</p>	

<p>lesson (AIDS lesson with pictures) which is easy to teach and to understand that interested the clients better.</p>	<p>clearly from the clients about their difficulties and to solve their absent in participation.</p> <p>-We have not yet to make explain the clients who are believing in God to choose an evangelical church nearby their places.</p>	<p>-We will follow our plan next quarter when we visited them.</p>
<p>Education program:</p> <p>- Children program assistant has collected data from the school tracking books for all kids, even though it was hard to do because it took a great deal of time but he has solved some of them through calling.</p> <p>-A child who wanted to stop her extra learning in Q1, she has been changed now, she could get up early on time because her parents helped to wake her.</p>	<p>-Most of the teachers said the book was not available the first time he tried to view it, so obtaining the data from the book required repeated visits with the teachers.</p> <p>-Some children have forgot to copy it for us, then we need to meet their teachers for getting hard copies also.</p>	<p>-We will continue to follow up her.</p>
<p>Infant formula program:</p> <p>-Through Mr. Heng Ban's God sharing, there is a family who has been receiving Jesus and their faith are influential to their relatives also. You could see their testimonies in the section G page below.</p>	<p>We have some brochure about God from New Life Fellowship church to share.</p> <p>Not time to brainstorm with Susan about object lessons involving formula yet. (She has been to US)</p>	<p>We will continue to share the Gospel and trying to contact them more for a church in their village to get in touch with them.</p>

Prison Feeding Program

Inmates at the provincial prison are given only a bare minimum amount of food per day. There are sick prisoners need more than the amount of food provided by the prison in order to reach full recovery.

Objectives	Planned Results (Target Indicator from logframe)	Actual Results for the past quarter	If your results were different from expected, why?	What changes will be made to ensure the target indicators are achieved in the next quarter?
Output 1: <i>Provide food for ill prisoners</i>	<i>30 prisoners will be served at least 41 meals each quarter</i>	<ul style="list-style-type: none"> • # of Prisoners: <ul style="list-style-type: none"> - Beginning: 30 - New: 12 - Stop: 12 - End: 30 - Total Served: 42 people • # of Days: 45 <i>100% indicators achieved</i>	Note: This quarter had 52 weekdays, however, our staff did not serve the prison on: <ul style="list-style-type: none"> • There were 6 public holidays <ul style="list-style-type: none"> - 3 days for Khmer New Year - 2 days for King Norodom Sihamoni's Birthday - 1 day for International & National children's day) • Big Event (for HBC clients) 1 day. leaving 45 days served	
Outcome 1: <i>Prisoners will gain or maintain their weight</i>	<i>80% of prisoners gained weight or stayed the same</i>	<i>There were 42 participants weighed:</i> <ul style="list-style-type: none"> - 12 participants gained weight and became healthy enough to be discharged from this program. - 20 participants were gaining weight but still be weak. - 6 Participants had stable weight. - 3 participants were losing weight. <i>38/42=90%; indicator achieved</i> <i>*We also formulaically used BMI from WHO for adult measurement with 29 participants which have the results as below:</i>	<ul style="list-style-type: none"> - 1 new participant has disabled legs (he got an accident falling from the palm tree for over 10 years) sitting in a wheel chair that we could not weight him. 	<ul style="list-style-type: none"> - We will follow-up all of them till the next quarter.

		<p>-22/29=76% who are in the properly weight -7/29=24% are under the properly weight Even though 24% are under weight, we are pleased with this result, because they are comparing prisoners to normal people outside the prison who have enough food to eat.</p> <p>*We have evaluated the 4 elders participants who gained weight but still be weak in Q1:</p> <p>-We stopped 4 of them in this Q2. 3 are getting better. 1 was getting worse after a week then he returned to our feeding service again.</p> <p>*4 participants had stable weight in Q1, now there are 2 of them are gaining weight and 2 others are still be stable weight but their body symptoms has been getting better.</p> <p>* 5 participants were losing weight in Q1, now there are 4 of them are gaining weight and 1 is stable this quarter.</p>

Prison Medical Program

Objectives	Planned Results (Target Indicator from logframe)	Actual Results for the past quarter	If your results were different from expected, why?	What changes will be made to ensure the target indicators are achieved in the next quarter?
<p>Output 1: <i>Sunrise medical staff will accompany the prison doctor in the clinic, cooperate to examine the patients, and give medicine as prescribed</i></p>	<p><i>At least 35 days served in clinic per quarter</i></p>	<ul style="list-style-type: none"> • # of patients: 239 (F13) *Included are new 137 (F11) and 102 continuing from Q1. • # of patient visits: 313 • # of days: 24 <p>52 weekdays per quarter (TWThF) less 28 days' work was not possible = 24 days served</p>	<p><i>The reasons affecting clinic service:</i></p> <ul style="list-style-type: none"> • There were 6 public holidays (3 days for Khmer New Year, 2 days for King Norodom Sihamoni's Birthday, 1 day for International & National children's day) • Prison prepared religious activity for Khmer New Year for 1 day. • Prepared Big Event 1 day. • CIRC organization had their operation of boiling the prisoners' clothes and materials in each cell for 2 days • The human rights organization LICADO used the exam room for 9 days. • The Centre of National Tuberculosis and Leprosy program's staff taken lung x-rayed for the prisoners for 8 days. • Vacation for nurse; 1 day 	<p><i>We have the human rights organization LICADO staff's hand phone number to contact, and we will work for the half day in the evening of their third day Activity (they work for 3 days monthly but at the third day they just work a half day because they need to travel back to PP)</i></p>
<p>Outcome 1: <i>Prisoners have caring treatment and receive medication without paying for it.</i></p>	<p><i>95% of prisoners that come to the clinic and need medication will receive it free of charge.</i></p>	<p><i>100% of prisoners that came to the clinic and needed medication received it free of charge.</i></p>		

Education Program

Children of parents living with HIV face the risk of acquiring HIV, discrimination, shame, loneliness, and a lack of opportunity to study. Often they must work to help support the family.

Chhun:

-Children who have visited 5 times up : 22

-Children who visited under 5 times: 9

Objectives	Planned Results (Target Indicator from logframe)	Actual Results for the past quarter	If your results were different from expected, why?	What changes will be made to ensure the target indicators are achieved in the next quarter?
<p>Output 1: <i>Meet with the student &/or parents to encourage school attendance, tutor (for grades 1-3), and provide accountability for doing homework</i></p>	<p><i>25 students who are children of HIV+ clients</i></p> <p><i>5 visits per student per quarter</i></p>	<ul style="list-style-type: none"> • # of students: 31 • # of students being tutored (grades 1-5): 14 • # of children visits: 193 • # of parent visits: 18 • # of students receiving assistance with tutoring fees: 17 (no teaching service) • Amount spent for tutoring fees: -\$311.58 • School supplies:- \$10.61 • Repaired bicycle: 0 <p><i>26/31=84% of the students were visited more than 5 times.</i></p> <p><i>3/31=10% of the students were visited 5 times.</i></p> <p><i>2/31=6% of the students were visited under 5 times.</i></p> <p><i>Total: 29/31=94%</i></p>	<ul style="list-style-type: none"> • 2 students whom we visited under 5 times <i>Because their school is far away from their village and they have to be there for the whole day.</i> 	<ul style="list-style-type: none"> • <i>We will decrease visiting the children around Kampong Cham whom we have visited more than 4 visits to get more times for visiting the clients who are far from the city.</i>

		<i>The students we were visited under 5 time from Q1, we have found out their schedules to see their free time for visiting.</i>		
Output 2: <i>Meet with the student's teacher to follow up on student progress</i>	<i>15 teachers 2 visits per teacher per quarter</i>	<ul style="list-style-type: none"> • # of teachers:23 • # of teacher visits: 44 <p><i>(2 visits per teachers=96%)</i></p>	<ul style="list-style-type: none"> • 4% that is under 2 times visited, because in April the school was on vacation. 	
Output 3: <i>Support students with whatever they need to stay in school, such as bikes, uniforms, books, and tutoring fees.</i>	<i>100% of students lacking basic school supplies (uniforms, bicycles, notebooks) receive the necessary items 12 monthly tutoring fee payments to the teachers for 100% of children enrolled in tutoring</i>	<i>We do the annual distribution of basic supplies in October. This quarter only one student needed a bicycle repair and received it: this is 100% of the students with a need. 100% of the teachers of students enrolled in tutoring received tutoring fees</i>		
Outcome 1-3a: <i>Students have sufficient accesses to school materials and are regularly attending school.</i>	<i>85% of the students attend 85% of the days that school is in session.</i>	<i>100% of the students attend school 94% or more of the days (50 days) (28/31=94%) Indicator achieved *2 student (6%) who has attended under 85% of the days: -1 of them had health's problems -1 other moving his house It's unrelated to school fees or supplies. *The holistic staff (a female) has counselled with her this quarter.</i>		<i>*We will get them more encouragement through our visiting.</i>

		<p><i>*One student who attended school under 85% from Q1 and has her personal problem. Our holistic staff has met with her for encouragement and now she has been going to school normally.</i></p>		
	<p><i>100% of students do not drop out of school or miss class because they lack transportation or supplies</i></p>	<p><i>100%</i></p>		
<p>Outcome 1-3b: <i>Improved academic performance.</i></p>	<p><i>85% of students receive a passing grade of 5.00 or above(a grade which allows promotion to the next grade at the end of the year).</i></p>	<p><i>90% of students received a passing grade of 5.00 or more.</i></p> <p><i>28/31=90% Indicator achieved</i></p> <p><i>*There are 3 kids who are very weak on their educational foundation.</i> <i>We have tried with all our best.</i> <i>-1 of them she has independent life, her parents are working for the whole day and no one at home to taking care of her.</i> <i>-1 other, his memories is so weak and very difficult to learn.</i> <i>-1 other is near reaching the indicator</i></p>		<p><i>-We will plan more time to visit him next Q3</i></p>
<p>Output 4: <i>Make memory book with students and their parents to preserve the child's family history</i></p>	<p><i>Make 5 memory books in a year.</i></p>	<p><i># of memory books this quarter: 2</i> <i>Annual total: 4</i></p>		

<p><i>Outcome 4: The child can tell something of his own history</i></p> <p><i>(Note: these books are typically made with pre-schoolers, who can't read them yet.)</i></p>	<p><i>100% of children who receive a book can tell something of their history in an age-appropriate way</i></p>	<p><i>100% of children who receive a book (4 kids) can tell such as:</i></p> <ul style="list-style-type: none"> - <i>Parents' name</i> - <i>Own age</i> - <i>Place of birth</i> - <i>Siblings</i> - <i>Who is they love most</i> - <i>What are they fond of.....etc.</i>

Infant Formula Program

Women may understand that an HUV infection put their baby at risk of poor health or HIV transmission, and so they may try to protect their baby by spending an exorbitant portion of their budget on formula, or changing to rice milk, which is not sufficient to maintain proper growth or health.

Objectives	Planned Results (Target Indicator from logframe)	Actual Results for the past quarter	If your results were different from expected , why?	What changes will be made to ensure the target indicators are achieved in the next quarter?
<p>Output 1:</p> <p><i>Give formula powder for first 12 months to babies whose mothers have HIV and get ARVs</i></p>	<p><i>Serve 20 babies per quarter</i></p> <p><i>Distribute cans of infant formula per quarter:</i></p> <ul style="list-style-type: none"> • 240 cans for 0-6 mo • 180 cans for 6-12 mo 	<ul style="list-style-type: none"> • # of babies: 18 (G11,B7) <ul style="list-style-type: none"> - Beginning: 14 (G8,B6) - New : 4 (G3,B1) - Stopped: 7(G5,B2) - End:11 (G6,B5) Total served: 18 • # of cans of formula for babies 0-6 months: 110 • # of cans of formula for babies 6-12 months: 144 	<p><i>The baby's amount has been decreasing. In fact some of new born babies are out of our location areas and do not meet conditions for giving the formula milk.</i></p>	<p>NA</p>
<p>Outcome 1a:</p> <p><i>The baby will not receive the HIV virus from the mother.</i></p>	<p><i>90% of infants that were negative at 1.5 months and are still in our program at 12 months remain negative at 18 months</i></p>	<ul style="list-style-type: none"> • 100% of the new babies 4 babies were negative result at 1.5 months • We have found out the data from AUA for babies that left our program last year and have reached 18 months. There are 12 babies who have to make tests in Q2, but we just got 8 results of them which are all negative. • Any ways, we still lost 4 other babies' result. 	<p><i>-The 4 babies whom we haven't got their test results, 2 of them are our RMC client's children and 2 others we have lost contact with them. AUA staff said that they got a SIM card that was only free for the first 3 months, so we no longer have a working phone number.</i></p>	<p><i>-We will solve the 2 babies in our RMC program to get blood test in Q3 and continue to try for getting information of the 2 other babies with AUA.</i></p>

<p>Outcome 1b: <i>Babies will gain weight appropriately to support good health.</i></p>	<p><i>90% of babies have a weight that is appropriate according to the age of the baby on the WHO standard weight chart: above the red zone.</i></p>	<p><i>94% of the babies are in the green zone of the WHO standard: exceeds expectations.</i></p> <p><i>17/18 * 100= 94%</i></p>	<p><i>-One of the babies (6%) is staying in yellow level zone of the WHO standard. Even so, this baby has a good health, he just slowing to get growth.</i></p>	
<p>Output 2: <i>Teach mothers how to properly use formula</i></p>	<p><i>100% of mothers receive instruction for the first three months when they pick up formula.</i></p>	<p><i>100% of new mothers (4 new mothers) were taught each month and they will be tested by the next quarter!</i></p>		
<p>Outcome 2: <i>Mothers understand how to use formula in a way that protects health of the baby.</i></p>	<p><i>80% of the mothers score 60% correct answers on how to use formula</i></p>	<p><i>80% of the mothers (5 mothers from Q1 who were surveyed by Q2) score 65% - 90% for correct answers.</i></p> <p><i>The average score was 76%.</i></p>	<p><i>-One of the mothers (20%) was decided to get her baby breastfeeding because her health is so good and the doctor encouraged her to make this decision</i></p>	

Home-Based Care Program

Poverty of HIV families leads to lack of food, lack of information on how to care for their own health, and easy of acquiring other common illnesses. Their variable health situation, coupled with discrimination from society leads to a loss of hope and further loss of health, a vicious cycle that leads to being unable to take responsibility for improving their own situation.

Objectives	Planned Results (Target Indicator from logframe)	Actual Results for the past quarter	If your results were different from expected, why?	What changes will be made to ensure the target indicators are achieved in the next quarter?
<p>Output 1: <i>Coordinate health care for people with HIV by visiting, taking vital signs, and giving advice, training, & basic medicines.</i></p>	<p><i>35 clients in the program</i></p> <p><i>4 visits per family per quarter</i></p>	<ul style="list-style-type: none"> • # of people served in the program: 35 <ul style="list-style-type: none"> - Beginning: 35 (M 11, F 24) - Stopped: 0 - New: 0 - End: 35 (M 11, F 24) • # of client visits: 160 • Out of the 35 clients that were part of our program the whole quarter: <ul style="list-style-type: none"> -20 of them received more than 4 visits -9 of them received 4 visits -6 of them received less than 4 visits. 29/35= 83% 	<p><i>We have followed our choices from Q1 to solve visiting the patients under 4 time visits. We achieved our goal with those people, but we realized that there were 6 other clients who were under 4 visits by this quarter instead. They are all living a bit far from the city so that it is difficult to visit them, and some of them are children who studying full time.</i></p>	<p><i>-We will decrease visiting the clients around Kampong Cham whom we have visited more than 4 visits to get more times for visiting the clients who are far from the city.</i></p>
<p>Outcome 1: <i>Clients understand how to use their ARV's, and also know what to do in case of common illnesses.</i></p>	<p><i>Q1: 50% of clients know 50% of information</i></p> <p><i>Q2: 60% know 60%</i></p> <p><i>Q3: 70% know 70%</i></p> <p><i>Q4: 75% know 75%</i></p>	<p><i>We surveyed 32 people (91% of the clients that were with us the full 3 months).</i></p> <p><i>* 3 others of 35 clients (9%), are still be little kids that could not learn much about health.</i></p> <p><i>-100% of them scored over 60%. There are:</i></p> <ul style="list-style-type: none"> -15 of them scored 100% -11 of them scored 90% -4 of them scored 80% 		

		-2 of them scored 70%		
<p>Output 2: <i>Coordinate holistic care for people with HIV by encouragement, and by providing small business loans, food supplements, and shelter repair.</i></p>	<p><i>35 clients in the program</i></p> <p><i>4 visits per family per quarter</i></p>	<ul style="list-style-type: none"> • # of people served in the program: 35 <ul style="list-style-type: none"> - Beginning: 35 (M 11, F 24) - Stopped: 0 - New: 0 - End: 35 (M 11, F 24) • # of client visits: 160 • Out of the 35 clients that were part of our program the whole quarter: <ul style="list-style-type: none"> -20 of them received more than 4 visits -9 of them received 4 visits -6 of them received less than 4 visits. 29/35= 83% • # of families receiving food supplements : 13 <ul style="list-style-type: none"> - Beginning:13+0 - 0= End 13 • # of families who got loans: 5 <ul style="list-style-type: none"> - Beginning:5+4= End 9 <p><i>There are 3 of them who have problems:</i></p> <ul style="list-style-type: none"> 1-Sreng Heng Lay (moved to PP) 2-DimMon (recycled selling price has collapsed) 3- Reak Smey Meas (she has been sick) • # of houses repaired: 2 	<p><i>-We have been visiting most for the clients who were given loans. (4 times/monthly each of them)</i></p>	<p><i>-We will discuss in our monitoring meeting for how to make solve of it for Q3</i></p>

<p>Outcome 2: <i>Basic human needs are met, and some medium level needs (according to Maslow's Hierarchy of Needs—all on Level 1, some on Level 2 & 3)</i></p>	<p><i>70% of clients we have surveyed say 1 of their needs has been addressed in the quarter (This is a revised indicator already discussed with Steve G)</i></p>	<p><i>100 % of clients whom we have surveyed say 1 or more of their needs was addressed this quarter There were 30 clients who were surveys in this Q2.</i></p> <p><i>In fact, clients we have surveyed say on average 4 or more of their basic needs have been addressed in the quarter. *Among those needs what they like most are ::</i></p> <ul style="list-style-type: none"> - Shelter 17/35=49% - Food 9/35=26% - Other needs 25% <p><i>We did not have any discussion about the difference between “addressing” a need (twer prausa lang) and solving a need (doh srey). We would like to be careful how we use language to make our survey more meaningful.</i></p>	<p><i>*Susan has been to US this Q2</i></p>	<p><i>*We will find time to meet for discussion on it by Q3 after Susan coming back</i></p>
